Laynig & Levelling

Base Structure

Cement Laying on Tile

Joints

Fixing The Tilo

Spacers + Laveller

Lavelling Wedges

After Lavelling Process
leave Int For 8-10 Hrs

Remove Wedges
Ones It Dry

Joint Grouting

Final Cleaning

Floor and Wall Installation

1. First spread the cement mixer onto the floor and wall substrate.
2. At the same time, apply the cement mixer onto the back of the slab with a tile trowel.
3. The recommended cement mixer must be spread over in one direction only.
4. Using a trowel and follow the same direction as previously applied to the back of the slab
5. Being careful to maintain a minimum joint of 3mm
6. Tap the slab with a rubber trowel for a complete fixing, ensuring the air is expelled
It is recommended to start from the centre of the slabs and then move towards the edges
7. Complete the laying operations using a suitable sealant, while keeping at least a 3mm joint through the use of spacers.
8. To make this task easier, use the special device for pulling over the slabs, available in the market
9. Levelling wedges at each linear metre of the slabs are recommended
10. After levelling process leave it for 8-10 hours, remove wedges once it gets dry.
